

Minimum Requirements for Windows Installation

The hardware requirements listed below will provide satisfactory processing speed in the HTS programs. Newer equipment will provide better, faster results.

Hardware/Software

Workstations

- Windows XP, Vista and Windows 7**
- Laser Printer (*not* a DeskJet / InkJet / BubbleJet)
- Tape Backup or other removable media
- Phone located near workstations (for support purposes)

**64-bit requires RMCobol version 12 or later. If upgrading workstations to any Windows 64-bit operating system please contact HTS for an updated RMCobol install.

File Server (for networked environments)

- 1 GB free disk space or more
- If using a dedicated file server (not used as a workstation), any Windows-based network or LINUX
- Drive letter mapped exclusively to Hi-Tech

Other

- Internet access and email capability. (high speed access recommended)
- Modem and phone line access on Resident Accounting system, if applicable
- Email contact(s) for correspondence

Hosting

- We partner with Kodiak Systems and VCPI to offer a hosted solution.
