

Have you attended one of our *free* Webinars? See the schedule for *February through April* at [www.Hi-TechSoftware.com](http://www.Hi-TechSoftware.com) > *Hi-Tech Clients* > [View Webinar Schedule.](#)

Our next update, scheduled for April, will enhance the ability to edit an **Electronic Medical Record** on each of your residents. Look forward to the following changes in the Face Sheet, Care Plan, Calendar and Notes.

## **Hi-One**      **Edit Medical Record for Each Resident**      *Coming Soon!*

If you like the “bird’s eye view” of a resident’s entire record provided by **View Medical Record**, you will love the new **Edit Medical Record**. This program will transform the current **Edit Face Sheet** into a multi-screen format with access to most of a resident’s medical record maintained in the Clinical System. The new program will allow you to record and maintain additional information such as:

- Longer names, a full middle name, prefixes (Mr, Mrs, etc.), suffixes (Sr, Jr, etc.), and nicknames.
- Primary physician, dentist, podiatrist, optometrist and four additional physicians identified by specialty.
- Increased number of fields to enter ICD9 diagnosis codes and allergies.
- Increased number of contacts, each identified by type of contact (1<sup>st</sup> to Notify, Financial, DPOA, etc.). You can enter a contact one time and select how that contact should be used.
- A new way to maintain insurance providers and sort them by priority.
- Ability to choose hospital and mortuary from a facility-specific library that you maintain.

## **Hi-Two**      **Print Face Sheet with More Information**      *Coming Soon!*

The new **Edit Medical Record** program will require a new printed face sheet design with the ability to select a one-page or multi-page format.

## **Hi-Three**      **Create Care Plans and Interact with Notes**      *Coming Soon!*

New screen designs and additional features will make the **Edit Care Plan** program more interactive and easier to use. On the Edit Resident Care Plan screen you will be able to:

- Easily select among problems, goals and approaches.
- Link approaches to goals rather than problems.
- Access **Edit Notes** to add care plan related notes without leaving the care plan.

## **Hi-Four**      **Keep Up To Date with the Clinical Calendar**      *Coming Soon!*

We are completely redesigning the **Calendar** module with the following improvements:

- Enter recurring events with ease.
- Print the calendar in a weekly calendar format.
- Require acknowledgement that staff is aware of a scheduled event.
- Enter the results of an event that has occurred.

## **Hi-Five**      **Access all Notes through One Program**      *Coming Soon!*

- Use a single **Edit Resident Notes** program to maintain Face Sheet, Progress, and RAP Notes. You will be able to access the Notes program from within various programs, such as **Edit MDS**, and the **Edit Notes** screen will identify the source program.
- **Edit Resident Notes** will provide easy access to view previous notes and create new notes.
- Use Notes security features to restrict unauthorized users from Face Sheets Notes, and “lock” completed notes to restrict further changes.
