

Hi-Tech develops relationships with other vendors and creates interfaces to their products. These alliances help Hi-Tech and these vendors to share expertise and expand capability.

This Hi-Five highlights some of those interfaces.

Hi-One Upgrade to the Next Generation of CareTracker

The interface between the Hi-Tech Clinical Records System and Resource Systems **CareTracker** reduces the amount of time it takes to complete MDS and Maine RCA records. It increases accuracy because your staff immediately records observations and the care given to a resident. Facilities that use CareTracker have seen an increase in Case Mix scores and reimbursement.

The new CareTracker **Gateway** features the Clinical Intelligence Tool, which looks at data and finds potential issues that could become problems. For example, the system will identify residents who are not drinking or eating, who are having constipation issues, losing weight too fast, or declining in ADL performance.

CareTracker **Gateway** provides Time and Attendance features so employees can punch in and out at CareTracker kiosks and allocate time worked on different jobs. Staff can review hours worked and benefits used, approve their timesheets and request time off.

Learn more about CareTracker at www.seecaretracker.com.

Hi-Two Ensure the Five Rights of Medication Administration

Use the IMAR Electronic MAR System to ensure the right resident, right medication, right dose, right route and right time during med passes.

-  Manage meds from a med cart equipped with a bar-code scanner, touch screen monitor and liquid-proof keyboard.
-  When you enter med orders, IMAR will also alert you if a resident is allergic to a med or if the med will react adversely with other meds.
-  During med passes, the System identifies each resident by a photo on the med screen and warns you if you select the wrong med or if you are about to give a med at the wrong time.
-  The system tracks pending meds and highlights meds that are about to be late, or that are late.
-  IMAR interfaces with the pharmacy for easy re-ordering.

Hi-Three through **Hi-Five** save you time by uploading data directly from another vendor's system to your Hi-Tech Systems so you do not have to enter the information manually.

Hi-Three Upload Therapy Charges to Resident Accounting

-  Eliminate manual entry of therapy charges from **Genesis, Rehab Works, PeopleFirst, and Casamba**.
-  Edit and post the charges directly to the resident's detail within the Hi-Tech **Resident Accounting System**.

If you use a different therapy charges system, call Hi-Tech and ask if we can create an interface for you.

Hi-Four Upload Medical Supply Charges to Resident Accounting

-  Eliminate manual entry of medical supply charges from **Gulf South, RedLine, MedLine and ChargeTracker**.
-  Edit and post the charges directly to the resident's detail within the Hi-Tech Resident Accounting System.

If you use a different supply charges system, call Hi-Tech and ask if we can create an interface for you.

Hi-Five Upload Time Clock Detail to Hi-Tech Payroll

Upload time clock detail from **TimeTrak, Kronos, Simplex and Jantek** into the Hi-Tech **Payroll System**.

-  Eliminate manual entry of time card details and save time.
-  Increase payroll accuracy.
-  Insure employee responsibility for recording their own hours.
-  Improve reporting and analysis of missed and late punches, and details by date, department and shift.
-  Automatically calculate shift differentials and overtime pay.

If you use a different time clock system, call Hi-Tech and ask if we can create an interface for you.
