

## 12 Months of **Hi-Lights** from Hi-Tech Software: 2007-2008

-  The major highlight is our **New Menu look** which is easier to read and navigate. With our one download/update process and Release number for all applications, it is much easier to keep all your applications up-to-date.
-  The monthly **Hi-Tech Hi-Fives** focus on five program features or HTS services that make your jobs easier. You can receive the Hi-Fives (and our quarterly newsletter) by email by contacting [Sharon@hi-techsoftware.com](mailto:Sharon@hi-techsoftware.com). You can read both publications on our website.
-  New interfaces for **DartChart, ChargeTracker and MealTracker**.
-  Additional MDS sections added to **CareTracker** interface
-  Electronic Medication Administration Record System (**IMAR**)
-  **Resident Referral System** provided with Resident Accounting and the Clinical Records Systems for Nursing and Residential Care. Use to focus your marketing efforts.
-  Streamlined **End of Year processing** in Resident Accounting, Accounts Payable, Payroll, General Ledger and Fixed Assets.
-  **Resident Accounting:**
  - Converted billing from the UB92 to the **UB04** and implemented the **NPI** number.
  - Bill **Commercial Billing with PPS** information.
  - Insurance **billing logs**.
  - Cash receipts aging** on screen and on demand.
  - Medicare B Fee schedule** is now **date sensitive** for all ancillary charges, including those imported through therapy interfaces.
  - EOM** created files.
-  **AP:**
  - Print **checks on demand**.
  - The *improved* **Invoice History Detail Report** (previously Paid Invoice History). Added **GL detail** for easier reconciliation
-  **General Ledger:**
  - Print Financial reports in **presentation format** suitable for presentation to your bank, accountant and other interested persons.
-  **Resident Trust Accounting:**
  - Processes **reoccurring charges** that do not change from one month to another.
  - Tracks your **Surety Bond limit** against the total of residents' assets.

## Clinical:

- Residents' **Inoculations**.
- Secure Notes**.
- Print **Med/Treatment Sheets** in two formats: small text and wide Days columns for hand-written notations, or larger text and narrower columns.
- Print **Care Plans** and **Service Plans** in a “graphical format” or “text mode”.
- Print **RCA Submission Labels** when you change to RCA submission on CD.

## **Highlights** for the year ahead

In addition to regular, ongoing enhancements to all our applications, Hi-Tech will continue development in the following:

- View Medical Record (VMR)** will provide a bird's eye view of the information you need to manage your residents' quality of care. Through the **Clinical Records System**, the **VMR** will provide access to a resident's entire electronic medical records from one screen.
- To resolve alignment issues **Print W-2s** will print *both* the form design and W-2 data on a blank 4-part perforated form that has required instructions preprinted on the back.
- MDS 3.0**: to meet the October 2009 national implementation date.
- Financial **Dashboard**
- Implementation plan for the **ICD-10** Diagnosis code standards in 2011.
